TruCluster™ Memory Channel Software Version 1.6

April 1999

Dear TruCluster Memory Channel Software Customer:

Thank you for your interest in TruCluster Memory Channel Software Version 1.6 for Tru64 UNIX (formerly DIGITAL™ UNIX®).

TruCluster Memory Channel Software Version 1.6 for Tru64 UNIX enables highly optimized applications to achieve high performance data delivery over the Memory Channel interconnect. The product's application programming interface (API) library allows programs to transfer data across the Memory Channel and use the Memory Channel locking capabilities.

The information and contents in this software kit are proprietary to Compaq and are offered in confidence, subject to the terms and conditions of your license agreement. This software is for your exclusive use only.

The TruCluster Memory Channel API library is also available as part of the TruCluster Production Server Software. Instructions to install and configure the TruCluster Memory Channel Software are included in the TruCluster Software Products documentation.

Hardware and Software Requirements

This TruCluster Software Products kit consists of the TruCluster Memory Channel Software. To use the TruCluster Memory Channel Software, please note that the following products are required:

- Memory Channel hardware (adapters, cables, and/or hubs, if necessary). Note that all configurations exceeding two AlphaServers require a Memory Channel hub.

UNIX is a registered trademark and the Open Group is a trademark of the Open Group in the United States and other countries. All other trademarks are the property of their holders.

- The Tru64 UNIX Version 4.0F operating system software and the accompanying documentation CD-ROMs.
- TruCluster Memory Channel Software Version 1.6 and its documentation are located on the Associated Products Volume 2 CD-ROM in this kit.

TruCluster Memory Channel Software Version 1.6 consists of the following new feature. The following table lists each feature and points to the specific TruCluster documentation providing more information about that feature:

Feature	For More Information:
Support for Memory Channel 2	<i>Hardware Configuration</i>

Please review the TruCluster Software Products *Release Notes* for more information about this release.

Documentation

TruCluster Memory Channel Software Version 1.6 documentation is available in both hardcopy and online versions. If you wish to have hardcopy documentation with this software and you did not receive it with your kit, you can order it separately with part number QA-4ZCAA-GZ. The online documentation is also available on line in HTML format on the Associated Products Volume 2 CD-ROM. The following books are in the documentation set:

- TruCluster Memory Channel Software *Read This First* (this document)
- TruCluster Software Products *Release Notes*
- TruCluster Software Products *Hardware Configuration*
- TruCluster Production Server Software *Memory Channel Application Programming Interfaces*

PDF and HTML versions of these and additional documents are provided in the following directories on the Associated Products Volume 2 CD-ROM:

- /TCR/doc/pdf
- /TCR/doc/html

Service and Support

If you have any questions about the installation or operation of TruCluster Memory Channel Software, please contact your local Compaq sales support office.

Again, thank you for your interest in TruCluster Memory Channel Software. We hope to continue providing quality software products that contribute to the success of your business.
