

IBM Support for Informix Dynamic Server (IDS) and MQSeries on Tru64 UNIX[®]

Tru64 UNIX continues to be a strategic platform for IBM-Informix. We are committed to supporting our mutual customers on Tru64 UNIX platform consistent with HP's strategy for this platform.

Paul Rivot
Director, Database Servers and Business Intelligence Software
IBM Software Group

Supported version on Tru64 UNIX V5.1B and its updates

Informix Dynamic Server (IDS) v9.40 and v10.0
WebSphere MQ 5.1

WebSphere MQ 5.1

IBM will sell Tru64 UNIX WebSphere MQ 5.1 at least through 2006 (12 month notice of any change), and support it at least through 2011 (12 month notice of any change). Support confirmation for WebSphere is via normal IBM license agreements (IPLA): see IBM customer letter.
